Workshop will highlight financial and environmental benefits of solar power

DENVER – Cary Hayes, REC Solar will present the workshop “Financial & Environmental Benefits of Solar Power Systems” from 4:30 p.m. to 6 p.m. on Jul. 29 at the Colorado Women’s Chamber of Commerce offices at 1624 Market St., Suite 340, in Denver, CO.

The workshop is \$15 for members, \$20 for non-members and walk-ins. Attendees can register online at www.cwcc.org.

Hayes, the REC Solar Regional Sales Manager will share the details behind the booming Colorado solar market, insights on the global PV industry, the declining costs of solar and other industry news. According to Hayes, choosing a solar power system for a home or business can provide one of the best high-yield, low-risk investments. In this workshop, attendees will learn how many homeowners and companies in Colorado have chosen to “Go Solar” and the benefits they have achieved.

Recent changes, enacted with the American Recovery and Reinvestment Act of 2009, provide significant financial benefit to new residential and commercial solar power system owners. Combining renewable energy grants from the federal government with rebates offered by local utilities significantly reduce the out-of-pocket costs associated with purchasing a solar

power system in Colorado. This workshop will instruct participants on how to take advantage of energy grants and rebates currently available.

For more information on the Colorado Women's Chamber of Commerce, call 303-458-0220, e-mail info@cwcc.org or visit www.cwcc.org.

The Colorado Women's Chamber of Commerce is one of the largest women's chambers in the nation. CWCC provides its members with the environment and resources conducive to business success, skills and knowledge about business issues and trends, visibility in the community and opportunities for community involvement and business partnerships.
